The Fund — Benchmark Variance Report

June 2026 NAV cycle · generated 05 Nov 2026 15:38 · **DRAFT — NOT RELEASED**

Audited NAV per unit at 30 June is **2.4172** against a published unaudited NAV of **2.4008**, a difference of **+0.68%**, above the 0.30% RG 94 materiality benchmark. All 63 financial statement tie-out checks pass (0 breaks). 6 open items are listed for the administrator and manager.

NAV variances

ID	Test	Ours	Theirs	Status	Explanation / action
B1	Audited NAV per unit (30 Jun) vs published unaudited ex-distribution NAV	2.4172	2.4008	EXCEEDS RG 94 0.30%	Published month-end NAV is an unaudited estimate; audited NAV is higher. Typical cause for a fund of private equity funds: underlying manager valuations received after the monthly report and booked in the year-end accounts. Not confirmable from the data room. Obtain the administrator's bridge from the published June NAV to audited NAV, with each post-report valuation adjustment and its source statement. Confirm whether any unit transactions (DRP, buyback) were priced off the published NAV.
B2	Cum NAV less ex NAV = declared final distribution per unit	0.04075	0.04070	TIES (4dp rounding)	Published NAVs are rounded to 4 decimal places. None.
B3	June distribution / cents per unit = units on issue at 30 June	26,631,902	26,691,000	QUERY	The June distribution implies fewer units than were on issue at 30 June. Candidate causes: record date before 30 June, or buyback units cancelled after the record date. Obtain the distribution record date and the registry unit count at that date.
B4	2026-07 one-month return recomputes from published NAVs	-10.34%	-10.30%	TIES (1dp rounding)	NAV 2.1525 / prior NAV 2.4008 - 1 (distribution-adjusted where ex NAV published). None.
B4	2026-08 one-month return recomputes from published NAVs	+4.32%	+4.30%	TIES (1dp rounding)	NAV 2.2454 / prior NAV 2.1525 - 1 (distribution-adjusted where ex NAV published). None.
B5	2026-06 one-month return	-	+20.00%	NOT TESTABLE	Prior month NAV not in the data room. Request the May NAV report.

Fee recomputation

ID	Test	Recomputed	Reported	Status	Note
F1	Management costs H1 (Jul-Dec 2025)	365,300	356,602	EXPLAINED	Estimate: intra-period monthly NAVs partly interpolated. Close fully with the administrator's monthly fee schedule.
F2	Management costs H2 (Jan-Jun 2026)	347,485	349,348	EXPLAINED	Estimate: intra-period monthly NAVs partly interpolated. Close fully with the administrator's monthly fee schedule.
F3	Year-end fee payable = June fee (monthly in arrears)	67,881	66,965	EXPLAINED	Payable implies a June fee base of 64,286,045 vs published cum NAV x units of 65,166,076.
F4	Performance fee — hurdle test	1,411,652	0	OPEN — HWM REQUIRED	Nil accrual is correct only if NAV per unit remains below the high water mark. The HWM and last payment period are not disclosed in the accounts.
F5	Secondaries mgmt fee & carried interest — H2 movement	-	-5,250	QUERY	H2 shows a net reversal of the carried interest accrual while the fund returned strongly. Ask the manager for the secondaries carry calculation at 31 Dec and 30 Jun.

Financial statement tie-out

63 checks: 55 tie exactly, 8 tie within published rounding, 0 breaks. Full workpaper in the Excel pack.

Open items

ID	Priority	Item
O4	High	June NAV bridge: published unaudited NAV to audited NAV (+0.68%, 436,747); confirm impact on any unit transactions priced off it.

ID	Priority	Item
O2	High	Request the high water mark schedule: HWM per unit, last performance fee payment period, and capital-flow adjustments since. Confirms whether the nil performance fee is correct (indicative exposure if not binding: 1,411,652).
O5	Medium	Distribution units: implied 26,631,902 vs 26,691,000 on issue at 30 June. Obtain record date and registry count.
O3	Medium	Obtain the secondaries carried interest calculation at 31 Dec 2025 and 30 Jun 2026 to explain the H2 reversal.
O6	Low	Request the prior-month (May) NAV report to test the June return.
O1	Low	Request the monthly management fee calculation schedule (fee base by month) to replace interpolated NAVs in F1/F2.
